Dear Pentriend,

Thank you for your letter. I'm sorry I haven't written for so long. I was busy at school. In your last letter you asked me about encourage young people in my school to study natural sciences. I want to describe you about my experience of learning science at school.

I like natural sciences, such as chemistry or physics. I also like geography cause I can learn more about our planet. But I have some problems in physics because physics is connected with maths & I hate maths. That's why I prefer geography to physics or chemistry.

I want to give one advice to you:

- Try to do homework at the same time each day & it will become a part of your schedule & it will be easier to

unep - 7-8-9

learn natural sciences

I am looking forward to hearing from you

Best wishes,

Dan
