Write your review.

Comment on the following problem:

Elderly people who live alone should be taken care of.

Write 100–120 words.

We live in the twenty first century. Our life is full of many technologies. I think the new sound monitoring system is a good and useful idea!

Not all elderly people who live alone can live independently. Many of them need help. If something happens, the system can help. A lot of dangers are in the life of elderly people. They are sound of a falling object, collapsing, human breathing and coughing, to sleeping. All noises made by the resident detected by the system. I suppose it is very important for elderly people should be taken care of! We can trust Japanese electronics technology.

7.

Score: 34.
